SUMMARY

Motivated and curious Full Stack Developer with hands-on experience building end-to-end web applications using the MERN stack. Adept at crafting intuitive UIs, designing RESTful APIs, and managing databases (NoSQL & SQL). Strong foundation in Data Structures, Algorithms, and software design principles. Passionate about solving real-world problems, rapidly learning new technologies (including DevOps and cloud platform), and collaborating in agile environments. Actively seeking opportunities to contribute to diverse tech projects and grow into a well-rounded tech professional.

EDUCATION

JSS ACADEMY OF TECHNICAL EDUCATION Noida Sec-62, India 2023 - 2025

Master of Computer Application - Computer Application — CGPA: - 8(Ist sem)
Relevant Courses: OOPS, Operating Systems, Data Structure and Algorithms, DBMS

M.J.P ROHILKHAND UNIVERSITY Bareilly, India 2019 - 2022

Bachelor of Computer Application - Computer Application — Percentage: - 65 %
Relevant Courses: OOPS, Operating Systems, DSA, DBMS, Computer Networks, Artificial Intelligence, Cloud Computing

SKILLS

Languages : Java, C/C++, JavaScript, TypeScript, SQL, Bash
Frameworks : React JS, Express Js, GraphQL
Tools : Git, GitHub, Postman, Figma, Docker
Databases : MySQL, Firebase, MongoDB
Platforms : Windows, VS Code, NodeJs

PROJECTS

PostAway- Social Media API ([Code Link](#)) Dec 2023 - Jan 2023

- Engineered robust Social Media APIs, enabling seamless user interactions and engagement, which resulted in a 50% increase in user retention and boosted **daily active users**
- Developed and deployed a suite of user interaction functionalities, including Follow/Unfollow, Posting, Updating, Commenting, and profile browsing, resulting in an **increase** in daily active users over six months.
- Enhanced app functionality by integrating **Real-time communication** capabilities, streamlined post management, and efficient updating features; boosted user **engagement**
- Built Fullstack app React, Context API, NodeJS, ExpressJs and MongoDB.**

Podstream - Podcast Streaming Application ([Code Link](#)) Apr 2023 - May 2023

- Redefining the podcast streaming experience with React app providing users to create and stream podcasts at an ease.
- Implemented Fullstack with **MongoDb** connecting **NodeJs & ExpressJS** for **REST APIs** and integrating with **AXIOS** in Frontend,
- Enhanced productivity by **leading a team of 4 members**. Tech stack: **React JS, Node JS, MongoDB, Firebase storage**

LexAI- Legal Comprehension and Assessment Tool Jan 2023 - Mar 2023

- Designed and deployed an **AI-powered legal assistant** that processes PDFs of law articles, generates concise summaries, and creates **multiple-choice quizzes** to evaluate user comprehension.
- Implements a scoring system that determines if a user has mastered the material, reducing redundant study by **40%**.
- Tech stack: **Python, LangChain/LLMs (GPT-4 or custom-trained models), PDFMiner, Transformer(BERT), MongoDB**

SEP- Smart Examination Portal Oct 2022 - Jan 2021

- SEP is a full stack application that allows Teachers to conduct exams online both in MCQs format and theoretical questions.
- Crafted an Exam management app, empowering teachers and student communities increasing efficiency for online exams.
- Tech stack: **PHP, HTML, CSS, SQL, JAVASCRIPT**
