SUMMARY

Passionate full-stack developer with experience in building scalable applications using React, Node.js, and MongoDB. Skilled in developing RESTful APIs, optimizing performance, and enhancing user engagement through efficient solutions. Strong problem-solving abilities and leadership experience in driving successful projects.

EDUCATION

JSS ACADEMY OF TECHNICAL EDUCATION Noida Sec-62, India 2023 - 2025 Master of
Computer Application - Computer Application — CGPA: - 8(Ist sem)
Relevant Courses: OOPS, Operating Systems, Data Structure and Algorithms, DBMS

M.J.P ROHILKHAND UNIVERSITY Bareilly, India 2019 - 2022 Bachelor
of Computer Application - Computer Application — Percentage: - 65 %
Relevant Courses: OOPS, Operating Systems, DSA, DBMS, Computer Networks, Artificial Intelligence, Cloud Computing

SKILLS

Languages : Java, C/C++, JavaScript, SQL, Bash
Frameworks : React JS, Express Js, GraphQL
Tools : Git, GitHub, Postman, Figma, Docker
Databases : MySQL, Firebase, MongoDB
Platforms : Windows, VS Code, NodeJs

PROJECTS

PostAway- Social Media API ([Code Link](#)) Dec 2023 - Jan 2023

- **Developed and optimized** robust social media APIs, enabling seamless user interactions and increasing **user retention by 50%** and daily active users.
- **Implemented core user interaction features**, including **Follow/Unfollow, Post Creation, Editing, Commenting, and Profile Browsing**, leading to a **sustained increase in daily active users over six months**.
- **Integrated real-time communication** and **streamlined post management**, enhancing engagement and system efficiency.
- **Designed and deployed a full-stack application** using **Node.js, Express.js, and MongoDB**, ensuring scalability and efficient database management.

Podstream - Podcast Streaming Application ([Code Link](#)) Apr 2023 - May 2023

- **Developed and launched** a podcast streaming platform using **React.js**, allowing users to **create and stream podcasts seamlessly**.
- **Built and integrated** a full-stack system with **MongoDB, Node.js, and Express.js**, implementing RESTful APIs and **frontend data fetching with Axios**.
- **Led a team of 4 developers**, optimizing collaboration and **enhancing productivity** throughout the project lifecycle.
- **Utilized Firebase storage** for secure media management, improving streaming efficiency and reliability.

Job Portal ([Code Link](#)) Jan 2023 - Mar 2023

- **Designed and developed** an **MVC based** job portal that connects recruiters and job seekers, streamlining the hiring process.
- **Implemented secure authentication** with **Role Based Access Control**, providing recruiters with a custom dashboard to manage job postings and applicants.
- **Build REST APIs** using **Node.js and Express.js**, ensuring smooth communication between frontend and backend.
- **Leveraged Supabase** for efficient **database management** and **Clerk Auth** for secure user authentication.
